

POLICY NAME	Botox (onabotulinumtoxin A)	POLICY #	2373P
--------------------	-----------------------------	-----------------	-------

Criteria

Criteria for Coverage for Chronic Migraine Headaches

- ☐ Documented diagnosis of chronic migraine.
- ☐ Documented headache diary or chart notes describing the patient's migraine history.
- ☐ Documented failure, intolerance, or contraindication to at least 2 American Headache Society Level A or B migraine prophylactic therapies with claims history to support member compliance with filling at least a 90 day supply within a 120 day time frame
 - Beta Blockers [?] Level A: metoprolol, propranolol, timolol [?] Level B: atenolol, nadolol
 - Antidepressants [?] Level B: amitriptyline, nortriptyline, duloxetine, venlafaxine
 - Anticonvulsants [?] Level A: divalproex, valproic acid, topiramate
- ☐ Reauthorization requires a documented reduction in “migraine days” by 7 days per month
- ☐ Prescribed by a neurologist (central nervous system doctor), physical medicine rehabilitation specialist, or pain management specialist
- ☐ Approval Time
 - Initial approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
 - Subsequent approvals: 4 procedures, spaced apart by 12 weeks with documentation that patient has experienced a positive response to therapy [?] Reduction in headache frequency and/or intensity [?] Use of acute migraine medications (e.g., non-steroidal anti-inflammatory drugs (NSAIDs), triptans) has decreased since the start of Botox therapy [?] Documentation that patient continues to be monitored for medication overuse headache

Coverage Criteria for Concurrent use of a Prophylactic C-GRP and Botulinum toxin

- ☐ Documentation showing that member has had at least a 6 month trial of botulinum toxin without adequate improvement in migraine, OR
- ☐ Documentation showing that member has had at least a 3 month trial of Aimovig, Ajovy, Emgality, Nurtec, Qulipta, or Vyepti as prophylactic treatment without adequate improvement in migraine
 - Coverage of Emgality 120mg requires trial and failure of Aimovig and Ajovy

Criteria for Coverage for Cervical Dystonia

- ☐ Alternative diagnoses ruled out including adverse effects of medications or other injuries or disorders of the muscles, nerves, tendons, joints, cartilage, or spinal discs Criteria
- ☐ Involuntary contractions of the neck muscles
- ☐ Chronic head torsion (twisting) or tilt
- ☐ Symptoms present for at least 6 months
- ☐ Approval Time
 - Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
 - Reapproval: 4 procedures each spaced 12 weeks apart with documentation that patient experienced a positive response to therapy

Criteria for Coverage for Overactive Bladder Syndrome

- ☐ Documented urinary urgency and frequency, urge incontinence and/or waking up in the night to urinate;
- ☐ Documented limited ability to participate in daily activities
- ☐ Documented failure of conservative therapies
 - Pelvic floor exercises
 - Biofeedback
 - Times voids
 - Dietary/fluid management under the direction of a qualified therapist
- ☐ Prescribed by a urologist (urinary tract doctor)
- ☐ Documented failure, intolerance, or contraindication to at least 2 anticholinergics, OR
 - Some examples are oxybutynin, tolterodine, Enablex, Toviaz
- ☐ Documented failure, intolerance, or contraindication to 1 anticholinergic and 1 other class of medication for overactive bladder syndrome
 - Some examples are amitriptyline, desipramine, clonidine, Myrbetriq, duloxetine
- ☐ Approval Time
 - Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
 - Reapproval: 4 procedures each spaced 12 weeks apart with documentation that patient experienced a positive response to therapy

Criteria for Coverage for Dynamic Contracture in Cerebral Palsy

- ☐ Documented hygienic problems or significant functional limitations

- ☐ **Approval Time**
 - Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
 - Reapproval: 4 procedures each spaced 12 weeks apart

Criteria for Coverage for Axillary Hyperhidrosis (excessive perspiration of the underarms)

- ☐ Uncontrolled perspiration present for more than 1 year

- ☐ Perspiration severely impacts the member's occupational and social activities

- ☐ Documented failure, intolerance, or contraindication to an adequate trial of topical aluminum chloride solution

- ☐ Documented failure, intolerance, or contraindication to local and systemic drug therapy
 - Anticholinergics
 - Beta blockers
 - Benzodiazepines

- ☐ Botox is not covered for hyperhidrosis (excessive perspiration) in other body areas because safety and efficacy has not been established

- ☐ **Approval Time**
 - Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
 - Reapproval: 4 procedures each spaced 12 weeks apart with documentation that patient experienced a positive response to therapy's

Criteria for Coverage for Chronic Anal Fissures

- ☐ Documented trial and failure of conservative therapy
 - Nitroglycerin ointment
 - Diltiazem
 - Bethanechol

- ☐ Prescribed by a gastroenterologist (stomach doctor) or colorectal (colon and anus) surgeon;

- ☐ **Approval Time**
 - Initial Approval: 2 procedures spaced 12 weeks apart within a 12 month approval duration
 - Max 2 procedures per lifetime

Criteria for Coverage for Upper Limb Spasticity

- ☐ Documented focal wrist, elbow, or finger spasticity which originated at least 6 weeks post-cerebrovascular event (CVE) or progression of multiple sclerosis

- ☐ Difficulty maintaining hygiene, dressing or pain
- ☐ Documented failure, intolerance, or contraindication to oral antispasmodics and muscle relaxants
 - Baclofen
 - Tizanidine
 - Cyclobenzaprine
 - Methocarbamol
 - Carisoprodol
- ☐ Sufficient motivation and cognitive function to actively participate in physical therapy post injection
- ☐ No documented fixed contractures (tightening of muscle tendons, ligaments or skin which prevents normal movement of the body part) or profound muscle wasting; AND
- ☐ Member will not receive treatment with phenol, alcohol, or surgery
- ☐ Approval Time
 - Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
 - Reapproval: 4 procedures each spaced 12 weeks apart with documentation that patient experienced a positive response to therapy

Criteria for Coverage of Upper or Lower Limb Spasticity for Pediatric Patients

- ☐ Age 2 to 17 years
- ☐ Documented upper limb spasticity due to cerebral palsy, traumatic brain injury, multiple sclerosis, spinal cord injury, and stroke
- ☐ Approval time
 - Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
 - Reapproval: 4 procedures each spaced 12 weeks apart with documentation that patient experienced a positive response to therapy

Criteria for Coverage for Lower Limb Spasticity

- ☐ Documented severe spastic equinovarus foot (overactivity of lower leg muscles) as a result of stroke
- ☐ Failure to respond to oral antispasmodics, physical therapy, orthotics or other non-operative modalities
 - Some examples of antispasmodics are baclofen, tizanidine, cyclobenzaprine
- ☐ Sufficient motivation and cognitive function to actively participate in physical therapy post injection
- ☐ No documented fixed contractures or profound muscle atrophy

☐ Member will not receive treatment with phenol, alcohol, or surgery

☐ Approval Time

- ☐ Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
- Reapproval: 4 procedures each spaced 12 weeks apart with documentation that patient experienced a positive response to therapy

Criteria for Coverage for Writer's Cramp (abnormal movement of the hand and/or forearm during tasks requiring skilled hand use, such as writing)

☐ Documented significant functional limitations that interfere with daily activities

☐ Documented failure of conservative treatments;

- Transcutaneous electrical nerve stimulation
- Biofeedback References
- Hypnotherapy
- Relaxation therapy

☐ Approval Time

- Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
- Reapproval: 4 procedures each spaced 12 weeks apart with documentation that patient experienced a positive response to therapy

Criteria for Coverage of Pediatric Detrusor Overactivity associated with a Neurologic Condition

☐ Age 5 and older

☐ Documented inadequate response to or intolerance of anticholinergic medications

- Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
- Reapproval: 4 procedures each spaced at least 12 weeks apart with documentation of positive response to therapy

Criteria for Coverage for Other Indications

☐ Diagnosis of Achalasia

- muscle disorder which prevents lower esophagus to open up during swallowing

☐ Diagnosis of Adductor laryngeal dystonia

- abnormal involuntary excessive contraction of the muscles that bring the vocal cords together

☐ Diagnosis of Blepharospasm

- abnormal contraction of the eyelid muscles

☐ **Diagnosis of Focal dystonia**

- Neuromuscular disorder with involuntary muscle contractions in one body part such as neck, face, jaw, feet or hands

☐ **Diagnosis of Hemifacial spasm**

- neuromuscular disorder causing frequent involuntary contractions of the muscles on one side of the face

☐ **Diagnosis of Jaw closing dystonia**

- involuntary and forceful muscle contractions of the face, jaw, and/or tongue

☐ **Diagnosis of Strabismus**

- condition in which the eyes do not properly align with each other when looking at an object

☐ **Approval Time**

- Initial Approval: 4 procedures each spaced 12 weeks apart within a 12 month approval duration
- Reapproval: 4 procedures each spaced 12 weeks apart with documentation that patient experienced a positive response to therapy CPT Codes HCPCS Codes J0585 Injection, onabotulinumtoxinA [Botox]
