

POLICY NAME	Corlanor (ivabradine)	POLICY #	2350P
--------------------	-----------------------	-----------------	-------

Criteria

Coverage Criteria for Heart Failure

- ☐ Diagnosis of persistent heart failure (NYHA class II-III) with left ventricular ejection fraction $\leq 35\%$, who are in sinus rhythm with resting heart rate ≥ 70 beats per minute
- ☐ Prescribed by a cardiologist (heart doctor)
- ☐ Documented failure, intolerance, or contraindication to a beta blocker, such as atenolol or metoprolol,
- ☐ Documented failure, intolerance, or contraindication to an angiotensin converting enzyme inhibitor (ACE-I, such as lisinopril or enalapril), OR an angiotensin II receptor blocker (ARB, such as losartan or candesartan)

Coverage Criteria for Inappropriate Sinus Tachycardia

- ☐ Prescribed by an electrophysiologist (doctor specializing in electrical activity of the heart)
