

<b>POLICY NAME</b>	Sucraid (sacrosidase)	<b>POLICY #</b>	2512P
--------------------	-----------------------	-----------------	-------

## Criteria

### Coverage Criteria

- ☐ **1.1** Diagnosis of Congenital Sucrase-Isomaltase Deficiency (CSID) confirmed by one of the following:
  - Documented stool pH < 6.0 and increase in breath hydrogen of > 10ppm when challenged with sucrose after fasting and a negative lactose breath test
  - Small bowel biopsy documenting decreased or absent sucrase activity, reduced maltase activity, decreased or normal isomaltase and lactase activity, and normal villous architecture
  - Genetic testing documenting pathogenic mutation in sucrase-isomaltase gene
- ☐ **1.2** Ordered by a gastroenterologist (stomach doctor)
