

POLICY NAME	Xuriden (uridine triacetate)	POLICY #	2515P
--------------------	------------------------------	-----------------	-------

Criteria

Coverage Criteria

- ☐ Diagnosis of Hereditary Orotic Aciduria as confirmed by one of the following:
 - Molecular genetic testing confirming biallelic pathogenic mutations in the UMPS gene
 - Clinical diagnosis supported by symptoms or urinary orotic acid levels above reference range
- ☐ Ordered by a Geneticist (gene doctor), Urologist (urinary tract doctors), or Nephrologist (kidney doctor)
- ☐ Documented failure, intolerance, or contraindication to uridine monophosphate
