

Pharmacy Drug Policy Checklist

POLICY NAME Ultomiris (ravulizumab) POLICY # 2735P

Criteria

Cov	erage Criteria for Atypical hemolytic uremic syndrome (aHUS)
	Documented diagnosis of Atypical Hemolytic Uremic Syndrome (aHUS) with all necessary laboratory results, signs, and/or symptoms and evidence of complement gene abnormality or factor antibodies (e.g. thrombocytopenia, microangiopathic hemolysis, thrombotic microangiopathy, acute renal failure)
	Prescribed by or in consultation with a hematologist (blood disorder doctor) or nephrologist (kidney doctor) in the Ultomiris Risk Evaluation and Mitigation Strategy (REMS) program
	Age 1 month or older
	Documentation of meningococcal vaccine series OR will receive vaccine at least 2 weeks prior to first dose (unless treatment cannot be delayed)
	Review of chart notes and labs documenting diagnosis and confirming that patient has met all of the above requirements for treatment with Ultomiris by both a pharmacist and medical director
Cov	erage Criteria for Paroxysmal Nocturnal Hemoglobinuria (PNH)
	Documented diagnosis of Paroxysmal Nocturnal Hemoglobinuria (PNH) with all necessary laboratory results, signs, and/or symptoms attributed to PNH (e.g. abdominal pain, anemia, dyspnea, extreme fatigue, smooth muscle dystonia, enexplained/unusual thrombosis, hemolysis/hemoglobinuria, kidney disease, pulmonary hypertension)
	Prescribed by or in consultation with a a hematologist (blood disorder doctor) or nephrologist (kidney doctor) in the Ultomiris Risk Evaluation and Mitigation Strategy (REMS) program
	Age 1 month or older
	Documentation of meningococcal vaccine series OR will receive vaccine at least 2 weeks prior to first dose (unless treatment cannot be delayed)
	Review of chart notes and labs documenting diagnosis and confirming that the patient has met all of the above requirements for treatment with Ultomiris by both a pharmacist and medical

C	ove	erage Criteria for Generalized Myasthenia Gravis (gMG)
[Documented diagnosis of Generalized Myasthenia Gravis as supported by the following: • Myasthenia Gravis Foundation of America (MGFA) clinical classification class II to IV • Myasthenia Gravis-Activities of Daily Living (MG-ADL) total score greater than or equal to 6
		Serologic test (blood serum test) showing anti-acetylcholine receptor antibody-positive (AChR+)
		Prescribed by, or in consultation with a neurologist (doctor of the nervous system) in the Ultomiris REMS program
		Age 18 years or older Pharmacy Drug Policy & Procedure
		Previous trial with at least one immunosuppressant drug (e.g. azathioprine, mycophenolate, cyclosporine, methotrexate, etc)
		Documentation of meningococcal vaccine series OR will receive vaccine at least 2 weeks prior to first dose (unless treatment cannot be delayed)
		Review of chart notes and labs documenting diagnosis and confirming that patient has met all of the above requirements for treatment with Ultomiris by both a pharmacist and medical director.

Cov	erage Criteria for Neuromyelitis Optica Spectrum Disorder (NMOSD)
	Documented diagnosis of neuromyelitis optica spectrum disorder (NMOSD) with chart notes indicating the member exhibits at least one of the core clinical characteristics: Optic neuritis Acute myelitis Area postrema syndrome (episode of otherwise unexplained hiccups or nausea and vomiting Acute brainstem syndrome Symptomatic narcolepsy or acute diencephalic clinical syndrome with NMOSD-typical diencephalic MRI lesions Symptomatic cerebral syndrome with NMOSD-typical brain lesions
	Documentation that the patient is anti-aquaporin-4 (AQP4) antibody positive
	Ordered by a neuro-ophthalmologist (brain and eye doctor) or specialist in the treatment of NMOSD in the Ultomiris Risk Evaluation and Mitigation Strategy (REMS) program
	Age 18 years or older
	Documentation that the member has been on a stable dose of immunosuppressive therapy (i.e., azathioprine, mycophenolate mofetil, oral corticosteroids, etc.)
	Lab cultures rule out any unresolved serious Nesseria meningitidis infection, if patient was diagnosed with N meningitidis infection recently
	Documentation of meningococcal vaccine series OR will receive vaccine at least 2 weeks prior to first dose (unless treatment cannot be delayed)

Exclusion Criteria – Any of the following prevents coverage		
	Ultomiris cannot be used in combination with another terminal complement inhibitor, such as Soliris (eculizumab)	
	Ultomiris cannot be used in patients with Shiga toxin E. coli-related hemolytic uremic syndrome (STEC- HUS)	
	Patients with unresolved Neisseria meningitides infection or who are not vaccinated against Neisseria meningitides (unless treatment cannot be delayed)	

Review of chart notes documenting diagnosis and confirming that the patient has met all of the
