POLICY NAME Nucala (mepolizumab) POLICY # 2470P

Criteria

Coverage Criteria for Asthma	
	Prescribed by an allergist, immunologist, or pulmonologist
	Age 6 years or older
	Documented concurrent use with one of the following: An inhaled corticosteroid and one additional asthma controller medication (e.g., leukotriene receptor antagonist) with lack of asthma control A maximally tolerated ICS/LABA combination inhaler with lack of asthma control
	erage Criteria for Eosinophilic Granulomatosis with Polyangiitis (Churguuss) Documented diagnosis of eosinophilic granulomatosis with polyangiitis
	Prescribed by an allergist, immunologist, or pulmonologist
	Age 18 years or older
	Documented concurrent daily glucocorticoid therapy
Cov	erage Criteria for Hypereosinophilic Syndrome (HES)
	Documented diagnosis of hypereosinophilic syndrome for 2: 6 months without an identifiable non- hematologic secondary cause (e.g., drug hypersensitivity, parasitic helminth infection, HIV infection, non-hematologic malignancy)
	Prescribed by a specialist
	Age 12 years or older
	Documentation that the patient has had HES flares while on stable HES therapy (e.g., chronic or episodic oral corticosteroids, immunosuppressive therapy, or cytotoxic therapy

Coverage of chronic rhinosinusitis with nasal polyps		
	Documented diagnosis of rhinosinusitis with nasal polyps	
	Prescribed by an otolaryngologist, allergist, or immunologist	
	Age 18 years or older	
	Documented failure, intolerance, or contraindication to intranasal glucocorticoids	
Coverage of Maintenance Treatment of Chronic Obstructive Pulmonary Disease (COPD)		
	Documented inadequately controlled chronic obstructive pulmonary disease (COPD) and an eosinophilic phenotype with both of the following:	
	 Baseline eosinophils of 2: 150 cell/mcL, or in the previous 12 months eosinophils 2: 300 cell/mcL 	
	 COPD with moderated tovery severe airflow limitation (post-bronchodilator FEVI/FVC ration <0.7 and post-bronchodilator FEV1 of 20% to 80% predicted) while on an optimized therapy 	
	Age 18 years or older	
	Documentation to support at least one of the following within the previous 12 months: • At least two moderate COPD exacerbations (requiring systemic corticosteroids with or without Statement of the Policy Criteria Purpose of the Policy antibiotics) or • At least one severe COPD exacerbation (requiring hospitalization)	
	Documented concurrent use with one of the following:	
	 Triple therapy (i.e., an inhaled corticosteroid (ICS), a long-acting muscarinic antagonist (LAMA), and a long-acting beta agonist (LABA) If ICS is contraindicated, a LAMA and LABA 	
	Prescribed by or in consultation with a pulmonologist
